Its hard to believe we have already finished the month of September as we head into October. The weather has stopped us from going to Warren Park on Fridays, but we hope Mother Nature will be more cooperative moving forward. We have been spending lots of time outside and will continue to do so. We ask your kids to be prepared for the weather as it starts to cool down into the fall.

Starting in October on Wednesdays we will be offering clubs. Students will have the option between an engineering club where they can build bridges and other structures. Another option is slime club where students will make different types of slime weekly. The teachers are excited to start these projects with the kids over the next six weeks.
